

Reference Designator (2nd) Update

Copyright © 2004 Altium Limited

This application is provided to allow the user to set a specific attribute (RefDes2) to be used as a second Reference Designator.

Running the Program:

- 1 With P-CAD 2004 PCB running and a PCB file loaded, select the component or components to update the second RefDes attribute.
- 2 Run REFDESUD.EXE
The application will display the Reference Designators of all selected components.
- 3 Click on the Update RefDes2 button.
All selected components will have the value of their RefDes2 attribute(if it exists) set to the value of the components actual Reference Designator.

While REFDESUD.EXE is still running, you may select other components, if needed:

- 1 Select one or more components in P-CAD 2004 PCB.
- 2 Click on the Get Component(s) button in REFDESUD
The reference designators of the newly selected components now be displayed.
- 3 Click on the Update RefDes2 button.
All selected components will have the value of their RefDes2 attribute(if it exists) set to the value of the components actual Reference Designator.

Click on the Exit button to close REFDESUD.EXE
